## WATERPROOF COVER

### Caratteristiche principali

- Pressione da 145 a 420 bar
- Normativa SAE J517-100R8, ISO 3949, DNV-GL
- Per la conduzione ad alta pressione di polioli, solventi e gas compatibili in ambiente marino e offshore

### Main Features

- Pressure from 145 to 420 bar
- SAE J517-100R8, ISO 3949, DNV-GL standard
- For the high pressure conduction of polyols, solvents and compatible gases in marine and offshore environments

### Caratteristiche tecniche

#### • Caratteristiche tecnico-costruttive:

Anima interna in poliammide, rinforzo in fibre tessili ad alta tenacità e rivestimento esterno in poliuretano antiabrasione, stabilizzato ai raggi UV, resistente all'ozono, ai microorganismi ed all'idrolisi, adatto per applicazioni all'esterno in ambienti particolarmente umidi e salini, microforato per passaggio aria e gas compatibili.

#### • Temperature di utilizzo:

Da -40°C a +100°C      Da -40°F a +212°F.

Per aria, acqua e fluidi a base acquosa la temperatura massima di esercizio è +70°C (+158°F).

#### • Pressioni d'esercizio:

Rapporto di sicurezza 1:4

#### • Valore max. di vuoto:

0.93 bar; 700 mm Hg

#### • Specifiche:

Tubazioni conformi o superiori alle norme SAE J517-100R8, ISO 3949, DNV-GL.

### Technical Features

#### • Technical-constructive features:

Inner core in polyamide, reinforcement in high toughness textile fibre, outside cover in abrasion resistant polyurethane, UV-stabilized, resistant to ozone, microorganisms and hydrolysis, suitable for outdoor applications in wet and saline environments, pinpricked for conduction of air and compatible gases.

#### • Working temperatures:

From -40°C to +100°C      From -40°F to +212°F.  
Max. working temperature with air, water and water-based fluids is +70°C (+158°F).

#### • Working pressure:

Safety ratio 1:4

#### • Vacuum rating:

0.93 bar; 700 mm Hg

#### • Specifications:

Hoses meet or exceed SAE J517-100R8, ISO 3949, DNV-GL Standards.
