

# piSAVE® restrict multiple port fitting 1.3, 01.29.341

- Vacuum flow restrictors which allows a few suction cups to miss the object(s) and still maintain enough vacuum level in the system.
- Suitable for handling different size sealed sheets/objects with the same flexible lifting device
- The vacuum flow restrictors shall be used in a centralized vacuum system, one for each suction cup.
- Designing with flow restrictors will require a smaller vacuum pump and save energy.
- Available in three sizes with different flow performance/characteristics to suit different size suction cups
- The restrictors are integrated in an Al-fitting with female and male threaded connections to facilitate installation

## General

Leakage flow, max.	0.57 scfm
Material	POM, Al, Nitrile (NBR)
Restriction, diameter	0.05 in
Temperature	-4 – 176 °F
Weight	0.73 oz

## Dimensional drawings
